

TUFFgate Structure

PRODUCT
FACT
SHEET

The TS Global range of TUFFgate structures boast a robust, heavy-duty design, ensuring swift conveyor installation with minimal reliance on tools and zero need for loose fasteners. It offers versatile placement options, allowing for both floor and roof mounting. Carefully balanced component weights mitigate the need for heavy lifting during assembly. Remarkably high levels of permissible belt wander are a hallmark of this system, complemented by an integrated tracking mechanism that effectively mitigates belt tracking concerns. Field-tested and proven, this product is now available through TS Global.

Application

Suitable for any conveyor.

 Proven Performance

 Quality Product

 Flexibility in Design

 On-time Delivery

FEATURES	BENEFITS
No Loose Pins or Fasteners	<ul style="list-style-type: none"> = Simplifies assembly = Reduces risk of lost components, streamlining installation
Lightweight Components	<ul style="list-style-type: none"> = Easier manual handling, reducing the need for heavy lifting equipment
End Frame Design with Belt Edge Clearance	<ul style="list-style-type: none"> = Improves safety and maintenance access = Prevents belt damage
Proven Design Elements	<ul style="list-style-type: none"> = Enhances reliability = Optimises performance
D-Shackle Mounting System for Belt Tracking	<ul style="list-style-type: none"> = Simplifies belt tracking adjustments and minimises the number of Idler Sets that need adjustment
3-Roll Return Idler Set	<ul style="list-style-type: none"> = Extends the lifespan of the equipment while reducing maintenance requirements
