

350 kW Combi Drive

TSGlobal[®]
Conveyor & Polyurethane Specialists

The **350 kW Combi Drive** is a powerful, self-contained conveyor drive system engineered for demanding underground operations. Compact yet robust, it delivers exceptional torque and reliability with dual anti-runback protection, ExD field wiring, and an electric hydraulic winch. Designed and built in Australia, the Combi Drive is **available now** — providing a high-performance solution ready to drive productivity from day one.

Key Features

- Suitable for belt widths up to 1500mm
- Suitable for a 350 kW drive configuration. The drive is not included but can be sourced or supplied separately
- Anti-runback system for enhanced safety (included)
- Field wiring ExD compliant
- Electric hydraulic winch for tensioning
- Belt storage 12m, extendable in 3m modules
- Purchase, hire and hire-to-buy options available.

Technical Details

- Designed for operation at 3.4 m/s belt velocity
- Compatible with multiple hydraulic load cell and winch setups
- Built with robust steel frame and integrated lifting and towing points
- Torque arm and starter not currently included but can be sourced or manufactured to suit.

Purchase | Hire | Hire-to-Buy Options
Available now — flexible solutions for every project phase

The Combi Drive is available through flexible supply options to suit your operation. Purchase for a permanent, long-term solution backed by TS Global's full support. Hire-to-buy offers a cost-effective path to ownership, allowing you to apply hire costs toward purchase. Or choose hire for short-term projects or when immediate deployment is needed — providing maximum performance without upfront investment (six month minimum term).
