

# Polyurethane Hard Skirt Liners

PRODUCT  
FACT  
SHEET

TS Global's Polyurethane Hard Skirt Liners are engineered to deliver superior containment and belt protection in high-capacity conveyor applications. Manufactured from premium high-performance polyurethane, these liners are engineered to conform to the belt profile to eliminate gaps, minimise spillage paths, and greatly reduce maintenance effort. Completely customisable to suit any chute or transfer point, each liner can be tailored in length, width, thickness, and chamfer angle to meet site-specific requirements.

## Application

Polyurethane Hard Skirt Liners are ideal for high-speed, high-tonnage conveyors where traditional steel skirts cause belt damage, require frequent adjustment, or pose manual handling risks.

-  Proven Performance
-  Quality Product
-  Flexibility in Design
-  On-time Delivery

FEATURES	BENEFITS
Polyurethane material wears to the belt profile	= Eliminates belt damage caused by cutting, scoring, or abrasion
Designed to drive into the belt for a tight seal	= Removes gaps and spillage paths = Improves containment
Completely customisable (length, width, thickness, chamfer profile)	= Tailored fit to any chute or transfer point for optimal performance
Compatible with existing skirt systems	= Simple retrofitting with minimal modification
Reversible design options	= Extended service life = Reduced replacement frequency
Lightweight compared to steel skirts	= Reduced manual handling risks = Easier installation
Requires significantly fewer adjustments	= Lower maintenance hours = Improved safety
Chamfered to suit belt specification	= Precise sealing and reduced wear on both belt and skirt
